Genic DataHub

About DataGenic

Since its creation in 2002, DataGenic is recognised as an international specialist in the delivery of data management solutions. DataGenic has developed an unrivalled knowledge of interval data, market pricing and reference data required by the industry, the complex usage of this data in analysis, trading, decision support, risk management, portfolio optimisation, operations and sales, and the technology needed to deliver and integrate information across the enterprise.

From a low-cost entry level to a full enterprise strength system, DataGenic sets a new standard in data management and operational efficiency by delivering the system infrastructure, flexibility and features to benefit from all their data assets within operational business processes.
